**West Michigan Chapter
Excellence in Chapter Leadership Development**

Using the tools included in the 2023 NTI Leadership Development Workshop, AACN-West Michigan Chapter engaged with several chapter members eager to take an active role in chapter leadership. As a result, our board of directors has nearly doubled, and our aim has been to empower these new members and partner with them to facilitate chapter goals and succession planning. Our experienced members remain highly engaged. Despite not holding official chapter officer positions, they continue to be essential in mentoring and creating experiential learning for our newer members. The fresh perspectives have already influenced our goal of promoting chapter awareness: We saw a 300% increase in our annual needs assessment responses. We will continue to engage with our community by expanding our social media presence and accessibility. We are proud of the professional development we foster!
