Greater Miami Area Chapter Excellence in Chapter Collaboration

Our Greater Miami Area Chapter (GMAC) of AACN is rising together with our community partners to enhance the experiences of GMAC members and local communities. This year, our collaboration comes from our community service team working with at-risk communities, holding educational programs with local groups and parks, and hosting our annual symposium at a local hospital. For many years, GMAC has worked with at-risk communities in our county by volunteering at their centers, collecting donations and holding medical educational events. We also partner with parks and organizations to hold STOP THE BLEED, CPR and healthcare education on stroke risk factors and signs, plus blood pressure screenings. These programs help empower our communities with the knowledge and skills that can save a life. Throughout the year we collaborate with various vendors to support our members with educational programming.
